

## EHS GATEWAY: THE LEARNING MANAGEMENT SYSTEM

Expand Environmental, Health and Safety (EHS) learning and meet compliance training requirements with a user-friendly learning management system. U.S. Compliance's team of EHS specialists paired with relevant, online courses is a comprehensive training solution.

### Online EHS Training with the LMS

Our LMS is designed with operations in mind. The simple interface allows for employees to easily find and complete required training, while the backend allows for customized training plans.

#### Top Features

- **EHS Expertise:** Our EHS specialists are available to support your questions and provide specific advice tailored to the needs of your facility.
- **Customized Training Plans:** Flexible groups allow training to be site and employee specific down to details such as location, role, job, or team.
- **Manage recurring training:** Configurable training frequencies to ensure everyone is assigned training when they need it.
- **Upload your own content:** Load and assign facility documents, SCORM courses, videos, PDFs, custom exams, and more.
- **Manage classroom training:** Online, remote, or blended, training can be tracked wherever it's delivered.
- **Access to 1,000+ Courses:** Our extensive course catalog contains content to fit your training needs and includes courses created by our experienced USC team.

#### Robust Reporting

- **Track completions:** Measure training progress for each member, team, and group.
- **Build custom reports:** Multiple ways to customize reporting for your organization.
- **Automated notifications:** Customizable application and email notifications keep trainings on track and drive engagement.
